1. Global Compensation Philosophy & Market Benchmarking

Quilltonty Technologies maintains a strict formulaic approach to total rewards. Our compensation structure targets the **75th percentile** of the market for equivalent technology roles, benchmarked annually against the Radford/Aon Global Technology Survey. By removing discretionary negotiation, Quilltonty Technologies ensures absolute internal equity across gender, racial, and geographic demographics.

2. The Total Base Compensation Formula Architecture

Base cash compensation for all non-executive personnel is calculated deterministically using the following formula:

$$\text{Total Base Salary} = \text{Role Benchmark Base} \times \text{Level Factor} \times \text{Geographic Location Multiplier}$$

No hiring manager, department head, or recruiter possesses authorization to override outputs generated by this formula.

3. Career Architecture & Job Leveling Framework

Our dual-track career progression architecture differentiates Individual Contributor (IC) technical mastery from People Management (M) scope. Roles progress from IC-2 (Associate) through IC-6 (Principal), and M-4 (Manager) through M-5 (Senior Director).

4. Base Compensation Grids (Engineering Track - USD Baseline)

The following table defines base compensation bands, target variable performance bonuses, and annual RSU equity refresher targets across engineering roles:

Level Code	Role Title	Band Min (USD)	Band Mid (USD)	Band Max (USD)	Target Bonus %	Target Annual Equity Refresher
IC-2	Associate Engineer	\$85,000	\$102,000	\$119,000	0%	\$10,000 / year
IC-3	Software Engineer	\$110,000	\$132,000	\$154,000	5%	\$25,000 / year
IC-4	Senior Engineer	\$145,000	\$174,000	\$203,000	10%	\$50,000 / year
IC-5	Staff Engineer	\$185,000	\$222,000	\$259,000	15%	\$90,000 / year
IC-6	Principal Engineer	\$230,000	\$276,000	\$322,000	20%	\$150,000 / year
M-4	Engineering Manager	\$160,000	\$192,000	\$224,000	15%	\$60,000 / year
M-5	Senior Director	\$220,000	\$264,000	\$308,000	25%	\$140,000 / year

5. Geographic Location Tiers & Labor Multipliers

Quilltonty Technologies adjusts base cash compensation according to localized cost-of-labor indices (rather than cost-of-living). Multipliers apply directly to USD baseline grids:

Tier Code	Designated Metropolitan Scope	Location Multiplier	Benchmark Index Basis
Tier 1	San Francisco Bay Area, NYC Metro, Seattle Metro	1.000 (100%)	Premium High Cost of Labor Index
Tier 2	Austin, Boston, Los Angeles, Washington D.C., Toronto	0.900 (90%)	Standard Metro High Tech Index
Tier 3	Chicago, Denver, Atlanta, Raleigh, London (GBP)	0.820 (82%)	National Average Tech Benchmark
Tier 4	All Other US Domestic & Regional European Entities	0.740 (74%)	Regional Baseline Index
Tier 5	LATAM & APAC Remote Contract Destinations	0.600 (60%)	International Contract Index

6. Equity Incentive Plans & Vesting Governance

Equity grants consist of Restricted Stock Units (RSUs) or Stock Options depending on corporate tax structure in the employee's jurisdiction. Initial onboarding equity grants vest over 4 years under a standard schedule: **25% vesting cliff at Month 12**, followed by linear 1/48th monthly vesting thereafter. Annual refresher grants carry no cliff and vest quarterly over 4 years (1/16th per quarter).

7. Administrative Governance, Reviews, & Zero-Negotiation Rules

7.1 Zero-Negotiation Policy

Quilltonty Technologies maintains a strict zero-negotiation policy on all initial job offers. All candidate offers are generated strictly via the mathematical formula defined in Section 2. Counter-offers or discretionary salary bumps are strictly rejected to eliminate systemic wage gaps.

7.2 Promotion Jump Floor

Any employee receiving a formal career level promotion (e.g., IC-3 to IC-4) is guaranteed a total base compensation increase equal to at least **8.0%** or movement to the minimum band threshold of the new job level, whichever is greater.
